Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

Claims 8 and 9 relate to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these claims (Article 34(4)(a)(I) PCT).

For the assessment of the present claims 8 and 9 on the question whether they are industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.

R Item V

R asoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following documents:

D1: WO-A-01/21160 D2: US-A-6177449

Novelty and inventive step

The document D1 is regarded as being the closest prior art to the subject-matter of claim 1-9 and describes certain benzopyran derivatives and their use as antiarrhythmic

The subject-matter of claim 1-9 differs from this known document in being a.o. pyridyloxybenzopyran derivatives substituted by a phenyl group and their use as antiarrhythmic agents.

The subject-matter of claims 1-9 is therefore new (Article 33(2) PCT).

The problem to be solved by the present invention may be regarded as the provision of further compounds which are useful as antiarrhythmic agents.

The solution to this problem proposed in claims 1-9 of the present application is

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application No.

PCT/FI2004/000011

considered as involving an inventive step (Article 33(3) PCT) for the following reasons: From the available prior art there were no incentives to use the above mentioned type of compounds. The present application consequently satisfies the criterion set forth in Article 33(3) PCT, because the subject-matter of claims 1-9 is considered to be not obvious and to involve an inventive step.

Industrial applicability

The present compounds are useful as antiarrhythmic agents. For claims 8 and 9 see Section III above.

It is further noted:

- 1) Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in the documents D1 and D2 is not mentioned in the description, nor are these documents identified therein.
- 2) The applicant is requested to file amendments by way of replacement pages in the manner stipulated by Rule 66.8(a) PCT. In particular, fair copies of the amendments should be filed preferably in triplicate.

Moreover, the applicant's attention is drawn to the fact that, as a consequence of Rule 66.8(a) PCT the examiner is not permitted to carry out any amendments under the PCT procedure, however minor these may be.
